

Construction on Wabash&Itasca Streets
Rhineland, WI.
October 5, 2019

The James Peterson Crews:

You have some of the nicest, courteous, workers! So efficient in everything they do. I mostly watched the whole construction, as I sat out on my lawn about every day, and watched in amazement of how efficient each and every worker did their jobs. It was like clockwork; each one had their own task and knew when and where it happened, It was so unbelievable. I've seen construction before but this was awesome! They were all very courteous, and any question that came up it was answered. Precision – every piece or part put in its place – fit. They moved those machines around with ease like they were toys. I think the engineer with the big shovel/digger could have frosted a cake with it. So precise! One guy ran several machines, and mowed down each and every hill of gravel, and spread it out like it was butter. Really, I just sat in amazement watching. I didn't want to miss a thing. (It was really a show of amazement, and precision) Great Company! When we get the pavement and grass seed down the streets will look awesome!
