

I am the widow of Senator Ellis and I want to commend you on the crew that you have working on the road project next to our place. They are very professional and the Chris the project manager is wonderful to work with. He has explained the layout to me exceptionally well. On another note, Kurt Vogel the DOT person in charge of the project told me that he loves working with you and your crew----he seldom has to do anything as they have things under control. Just wanted you to know how I feel and I will pass this information along to my "senator friends"

Sandy Ellis
